July 1st Celebration Unqualified Success

Champion fully maintained her reputation as an entertainer on Wednesday in the hands of the Elks, when a crowd of over a thousand people crowded the grounds and grandstand for the annual celebration. The presence of the Vulcan band was naturally one of the outstanding factors in what proved a highly successful afternoon, as the music provided was an inspiration to spectators and contestants alike, and they were not least bit stingy with their provision of musical entertainment.

Carmanagay and Staveland met in the first baseball, this contest providing a thrilling exhibition which was not decided until twelve innings had been played to a 4-3 decision in favor of Staveland. Haynes and Rae were in the points for Staveland while McLaren and Watts were the Carmanagay battery.

Vulcan and Yetwood also furnished the crowd with good entertainment, the latter winning by the close score of 5-4. Batteries: Vulcan, Wall, War and Becor; Yetwood, F. Steeves and Harry Matlock.

Three softball games were played, the Barons teams defeating Kirkcaldy; Champion girls' team winning from Vulcan, and Vulcan winning from Reid Hill. All these games were well contested and added to the general enjoyment.

A complete programme of athletic sports was run off, the different events bringing an unusual number of entries and providing keen contests which were fully appreciated by the spectators. A list of the entries and winners in these events is held over until next week.

The horsemanship tournament attracted an unusual number of entries and devotees of that pastime certainly enjoyed themselves. Entries included a number from a distance and the winners of the events certainly had to extend themselves to win, the competition being of the keenest, and Champion has reason to feel proud of the fact that local players carried off the bulk of the prizes. Neil McLeod and Baker winning 1st prize in the double event, while A. Baker won the prize for the most ringers in pitching fifty shoes. Turin entries were second in the doubles and won first in the singles, and also high points in pitching fifty shoes. C. McLean being a close second in the latter.

Ted Nielson of Carmanagay and assistants gave an exhibition of trick roping that was worth the price of admission to the grounds alone. This gentleman certainly knows his onions in the roping line. His exhibition was generously applauded.

The final baseball game between Staveland and Yetwood was the evening attraction on the grounds. In this game Yetwood had a complete reversal of fortune displayed in the afternoon and were beaten by a big score, the batteries were: Staveland, Rae and Steikie; Yetwood, Ferguson, Russell, J. Steeves and Harry Matlock.

E. Siler umpired all three games with evident satisfaction to everyone concerned, in fact this feature was noteworthy in the promptness of the appearance of the teams when "Play Ball" was called, and the lack of disputes.

The crowd, which numbered 1,000 or over included many from Carmanagay, Barons, Staveland, Vulcan and the Yet-

Transferred To Fort Saskatchewan

Mr. and Mrs. W. Jensen leave the first of the week for Edmonton, Mr. Jensen having been transferred by the U.G.G. to that point. While here Mr. and Mrs. Jensen have made many friends who will regret their departure, but as they will practically be able to live in Edmonton they are pleased with the change. Mr. Jensen will be missed particularly in the curling club of which he was an enthusiastic member. All will wish them success in their new home.

Champion Pupils Win Honors

In the recent musical examinations in Lethbridge, conducted by the Toronto Conservatory of Music, Miss Helen Higgins passed her violin examinations with first class honors. Gordon McLean, clarinet, also achieved the same distinction. Great credit is due both pupils and teacher in this satisfactory result, and congratulations have been in order for both the successful pupils and their teacher, J. Geo. Harper of the Lethbridge Conservatory of Music.

Shool Staff Away For the Holidays

The teaching staff of the Champion Consolidated School will disperse in all directions this year. Miss Cameron will attend summer school at Ed. Gleichen, Miss Archer to Calgary and later to Kingston, Ont. Miss McPhail to Spokane and later to California, while R. D. Farries will spend the holiday at Trochu. Mr. and Mrs. R. I. Baker left for Calgary on Tuesday, from where Mr. Baker will proceed to Edmonton to assist in reading examination papers.

Music Pupils Pass Examinations

The following are the results of pupils entered by Miss Ruby Graham, for the examinations the Associated Board of the Royal Academy and Royal College of Music, London, England. Higher division Piano—Betty Wright, Vulcan. Elementary division piano—Helen Wright, Vulcan. Grammar of Music—Agnes Holm, Champion, Baker, McCullough, Champion, Betty Wright, Vulcan, Helen Wright, Vulcan, Billy Wright, Vulcan, Marjorie McCullough of Champion and Betty Wright, Vulcan, had the distinction of having perfect papers.

Wood and Reid Hill districts was certainly a fine one considering circumstances. The Elks are to be highly congratulated on the manner in which all phases of the programme were run off, and the efficient management in evidence throughout.

The dance in the evening taxed the capacity of the Community Hall to the utmost, Joe Tomte's orchestra providing excellent music for the occasion. A picture show in Campbell's hall also provided an evening that was well patronized.

Good News!

Your local Theatre has Arranged to show a Special Talking Picture

This Saturday Nite

In Campbell's Hall

where sound is as good as any city theatre. Please make arrangements to attend, and it will perhaps be the starter to bring to your town plenty of good entertainment right at your door. The feature picture will be

GARY COOPER

"A MAN FROM WYOMING"

Pretty rough on a woman—loving "A Man From Wyoming" But this woman likes it! See why! Gary Cooper in his latest romantic thrill.

A he-man and a she-woman in nobody's land! "A Man From Wyoming" brings you a thrill-a-minute. Gary Cooper, better than ever.

Meet "A Man From Wyoming" and see why women love him—Gary Cooper, the gallant "Virginian," the cavalier "Texan," now treats 'em rough!

And they say it was a MAN'S WAR! See what happened to "A Man From Wyoming!"

He is a captain of men—but she commands a battalion of hearts!

"So Long-Loity"

Admission 15-25-50

The June meeting of the Ladies' Aid was held in the Pavilion on Thursday, June 25th. Thirty were present of whom a number were visitors. The minutes of the previous meeting and the financial report for the past six months were read. After a discussion it was decided to have a booth on the grounds on July 1st, with Mrs. R. Lucia and her group in charge, others to assist. Refreshments were served by Mrs. Dawson assisted by Mrs. R. I. Baker. The next meeting will be held at the home of Mrs. C. McLean on Thursday, July 30th.

"If the World's Grain Exhibition and Conference to be held at Regina in 1932 accomplished nothing further than to stimulate a more general consciousness of the value of pure seed and its worth to Canada in maintaining the export quality of its field products, it will have more than attained its object and will have justified in every way its organization." W. T. G. Wiener, secretary of the Canadian Seed Growers Association.

A profusely illustrated pamphlet entitled "Turkey Production," by G. M. Curme, poultry commissioner for the Province of Alberta, has just been issued by the Department of Agriculture and should be in the hands of everyone interested in turkey farming on a large or small scale. Copies of it may be had on application to the department.

CAMPBELLS

A FOWL STORY

"Did you ever stop to think that hard times mean nothing to a hen? She just keeps on digging worms and laying eggs, regardless of what is said about conditions. If the ground is hard, she scratches harder. If it's dry, she digs deeper. If she strikes a rock, she works around it. But always she digs up worms and turns them into hard-shelled profits as well as tender boilers. Did you ever see a pessimistic hen? Did you ever hear of one starving to death waiting for worms to dig themselves to the surface? Did you ever hear one decide because times were hard? Not on your life. She saves her breath for digging and her cash for eggs."

Men's English Sweaters

Just a dozen, beautiful quality, coat style, summer weight, featuring Heather, Sand and Black and White. New stock. Special **\$4.95**

Rayon Bloomers

A wonderfully good quality of smooth, silky, rayon for this season—and some are of new-run knit. Campbell's

"Where They All Go."

A pulpit exchange between the United churches of Vulcan and Champion has been arranged during the months of July and August. Rev. Peter Dawson of Champion will preach at Vulcan in the morning, Blusson in the afternoon, at Champion in the evening during the month of July. The Rev. J. N. Brunton will preach at Champion in the morning and Vulcan in the evening during the month of August.

Card of Thanks

Miss Willies wishes to thank her many kind friends for their help and sympathy during her recent bereavement.

Joseph Sansome wishes to thank the B.P.O.E. for flowers sent to the hospital at Vulcan during his recent illness.

J. C. Atkins and Ole Palmer returned from a trip to the Peace River country on Saturday. While there they were the guests of Clarence Weiss for some days and also met the Kost boys. Crops were splendid but freight rates are a big handicap in that part of the country. While they found suitable land they were unable to make entry before July 1st and so returned home a few days later.

The booths conducted in the grounds by the Elks and the Aids done a thriving business on July 1st providing a treat-ment for the crowd.

THURSDAY, July 2, 1931

NOTES AND COMMENT.

The licensing of peddlers, etc., by the provincial authorities instead of municipal authorities has been receiving attention recently, and the decision seemed to be that the towns and villages actually suffered in consequence. The trouble is that a blanket license as issued by the province gives the transient trader and peddler an equal opportunity to sell goods as the man who erects a building, helps pay for schools and other improvements, and helps otherwise in building up the community, for next to nothing in comparison. Naturally, this is not in the interests of permanence, to say the least.

The collision between police and unemployed at Winnipeg and Windsor last week indicates that the advocates of violence are getting in their work. As a rule those who are anxious to work are not inclined to clash with the authorities, in fact the great majority invariably avoid such clash. Urged on by paid agitators the most reasonable of human beings are apt to be led into demonstrations which they would otherwise avoid. The situation is bad enough without the interests of the deserting being jeopardized by such outbreaks as occurred in the cities mentioned.

The wheat held by the United States Farm Board promises to undo in decreased prices for the 1931 crop all the good buying it achieved in the sale of the 1930 crop. So long as this big surplus hangs over the market, just so long will buyers be nervous in their estimate of the situation.

Senator Gideon Robertson, Minister of Labor for Canada, who has been in the last two weeks, making a personal investigation of the unemployment situation, returned East from the Pacific Coast via Canadian National railways. During his visit, Senator Robertson consulted with prominent officials, and he takes away with him a clear picture of the unemployment situation in the west which he will place before the government on his return to Ottawa.—C. N. News.

There seems to be some surprise at the result of the aid proposed to be extended to single men in Calgary, as it was found men rushed from all quarters to get in on such a good thing. There was a day in this country when the acceptance of relief was avoided by every possible means. Nowadays it seems to be a popular method of getting along, sometimes without work entirely. There is a rapidly growing number of people who, instead of trying to help themselves, are entirely willing to let the other fellow do the work and provide the wherewithal for them to live. There will always be deserving poor, but the present system seems likely to re-

sult in everyone being poor when relief is in sight.

Things may not be too good here but this is a garden of Eden compared to parts of Saskatchewan, where the third crop failure in succession is practically assured and where water for stock is becoming very scarce.

Senator Robertson, minister of labour in the Bennett cabinet sobbed when he tried to tell of conditions in Saskatchewan at Winnipeg. Present conditions are bad enough anywhere, but in Saskatchewan the situation is aggravated by crop failures in two immediately preceding years. Dried out this year again the future of the people in the large part of the province affected is naturally hard to imagine and might easily lead anyone to shed tears who had any interest in the matter from any angle, even if it was only the business that would have resulted from good crops.

Crops in general have made very satisfactory progress during the best week and there are many fine fields in the district. The gophers are unusually bad this year in parts, and grasshoppers have made their appearance along the Little Bow river in places. Taken altogether the situation is fairly satisfactory. Summer-fallowing operations are under way as usual, and nearing the end for the time being are well well to date.

Strange Malady Takes Toll of Fish in Lake

A strange disease is affecting the fish in Lake McGregor, and experts in ichthyology will be called to investigate the matter. The shores of the lake are strewn with hundreds of fish, dead and dying. Constable Stanton of the A.P.F., stationed at Lethbridge, patrolled the lake. On the shore of the south end, he found evidence of the plague among the fishes in fishy corpses strewn the shore in some places twelve inches apart. The morbus seems to have been particularly fatal to suckers. They constitute the major portion of the toll, with an occasional pike which has been a victim to the strange malady. An examination of the dead showed reddish spots resembling T B spots. When opened up the flesh showed a reddish tinge. The opinion has been advanced that the fish were injured while passing through the dam. But Constable Stanton is quite satisfied that this is not the case. He noted that the fish came to the surface of the water and died along the banks of the lake.—Lethbridge Herald.

Drift Soil Source of Damage to Trees

W. H. Schmeelke is of the opinion that dust and sand drifting around trees will in time kill them and that the removal of the sand will vastly improve conditions. Where this was done it was found that the bark on the trunk was decayed where it was covered by the dust. In addition these fine particles are almost impervious to moisture.

Provincial Crop Report As Compiled June 26th

A large section of the Province has received a plentiful supply of moisture during the past two weeks. Telegraphic reports reaching the Department from various sections of the

Province today, indicate that prospects have greatly improved, particularly in the case of the later sown grain. The early sown wheat is heading out somewhat short in places on account of the lack of moisture and high winds in the early part of the season. The later sown wheat, oats and barley are showing a fine stand in all districts where sufficient moisture has been received. The extreme southern part of the Province and a considerable area through the south-eastern section has not had sufficient rain and high winds are still prevalent doing much damage.

Pastures generally have improved rapidly during the last two weeks in those areas where precipitation has occurred. In districts where the wind damage and where dry weather prevailed in the early part of the season, pastures have not yet revived sufficiently to provide food for stock.

Grasshoppers and cutworms have done some damage in isolated places. Taking the Province as a whole, however, this has been very slight. Alfalfa is a heavy stand in the irrigated area. The first cutting has now commenced.

Warmer weather would be welcome but crops are growing rapidly over the greater part of the Province and all but the early sown grain gives promise of a good return except in the districts where moisture has not yet been sufficient.

Consolidation Of Debts Is Suggested As Solution Of Economic Problem In West

Only by reorganization and consolidation of debts will it be possible to remove the menace of fear and discouragement that oppresses the western farmers, merchants and other business interests, said Prof. W. W. Swanson, head of the economics department, University of Saskatchewan, and adviser to Premier R. B. Bennett, when he remarked now was the time to deal with the critical situation which had developed from crop conditions, frozen credits, low prices for farm products, by attacking the debt and credit problem on a comprehensive scale.

Dr. Swanson, who is in communication with the premier and Premier Bennett, said that the three most urgent problems seeking solution in the west were debt adjustment, unemployment and provision for marketing the coming crop. He outlined a plan for dealing with these questions.

He considered that the debts should be divided into two categories of fixed and floating obligations. The fixed debts, which included mortgages, should be automatically extended without cost to the farmer for a period of three years, during which time steps could be taken to develop a plan for a more permanent settlement.

The second group of debts, oil, gas, accounts at country stores, bank loans and so forth, Dr. Swanson estimated amounted to \$250,000,000 and upward for the 200,000 farmers in the three prairie provinces.

He considered that these should be consolidated and paid in bonds with a substantial reduction in the interest rate. The federal government to pay one-third, the provincial government one-third, and the farmers the balance.

These bonds would have a life of three years, during which time legal processes against farmers entering the scheme would be prevented.

Pheasants For Manitoba

Efforts Made To Increase Game Resources Of The Province
The Provincial Government is co-operating with the Manitoba Game Protective League in introducing ring-necked and Mongolian pheasants into Manitoba. A shipment of 300 eggs is now en route from the Pacific coast and will be distributed to experimental farms within the province. Experiments will be carried on with the two varieties to discover which is better suited to Manitoba climatic conditions.

Last year the Game Protective League distributed 4,000 eggs in small lots among individual farmers and it is estimated that 2,000 birds were hatched from these settings. Efforts to increase the game resources of Manitoba are designed both for the benefit of the resident and of the professional sportsman.

New Agricultural Colony

Group Of Ohio Farmers Settle In British Columbia

Sheli Lake, northwest of Prince George, has been selected by a group of Ohio farmers as the site of British Columbia's newest agricultural colony. They have acquired most of the land around the lake and 18 settlers have arrived there to build homes for themselves during the present summer. More will come later. A large community house has been built on the lake shore to accommodate the new arrivals while they are building houses and the equipment of the colony includes a portable saw mill for making lumber and an electric light plant. The colonists are developing their settlement without assistance from the government. They came from Youngstown, Ohio.

Germany has issued \$250,000,000 bonds to owners of radio sets.

Cheaper Summerfallow

Light Cultivation To Keep Down the Weeds All That Is Necessary

Scientific agriculturists at Universities and Experimental Farms have recently been giving a good deal of thought to the question "Why Do We Plough?" Some experiments that have been made, particularly by Mr. J. C. Taggart, Superintendent of the Dominion Experimental Farm at Swift Current, Sask., seem to indicate that under certain conditions we can obtain just as good results in our fields without so much ploughing.

The only reason for working the land in Western Canada should be to keep down the weeds. The only reason for summerfallowing should be to conserve moisture, but these two things are somewhat antagonistic. There should be no cultivating of the ground beyond the very minimum required to control weeds. Experiments show that shallow tillage is just as efficient for producing crops as deep ploughing, provided weeds are killed. Shallow tillage, too, is considered to be less conducive to soil blowing than deeper tillage.

The suggestion is made, therefore, that under conditions where the method is practicable that farmers might save a good deal of money by simply cultivating stubble that is intended to be summerfallowed instead of ploughing it as usual, cultivating it not more than three inches deep and only at sufficient intervals to keep and it is the weeds that mainly rob the summerfallow of moisture.

The Agricultural Research Department of the Seattle Grain Commission would be very glad to have participants of results from any farmers who have used this method or who may try it this season. The writer sums up this method as follows:

merfallowed large fields by this cultivating method at Penn, Alberta, for three years running obtained results that were just as good as from adjoining fields that were ploughed in the usual method, and, of course, at a much cheaper cost. The fields seem to be even cleaner from weeds and the yield certainly just as good. The writer further noticed that in his plot work where weeds are pulled by hand that greater yields were always obtained than on those plots where the weeds were cultivated with a machine, this certainly indicating that the land should not be stirred up by the implement any more than absolutely necessary to keep down weeds.—H. G. L. Strange.

To Combat Cutworm Ravages

Danger May Possibly Be Worse Next Season Than At Present

In all probability the danger to crops from the pale western cutworm may be worse next season than this, and in this respect the use of the "indicator strip" is advised, states H. L. Seaman, of the Dominion Entomological Laboratory, Lethbridge, Alberta, in a letter to the Saskatchewan Bureau of Publication.

Satisfaction that "indicator strips" sown this spring give a true indication of the extent of cutworm infestation has been expressed by the majority of farmers using this method. Mr. Seaman notes:

Safe Petrol From Tar

Chemists at the Belfast Municipal Works announced they had produced a non-inflammable white petrol from tar oil which can do four more miles to the gallon than the ordinary gasoline used in automobiles. They assert there is no carbon monoxide in the exhaust, engine knocks are eliminated and the fuel is cheaper than the present commercial article.

DON'S ENGLISH OUTLET

Don's English Outlet

Don Jaime, second son of King Alfonso of Spain, seems to be fully resigned to his exile. He is seen above strolling through The Strand, London, England, dressed in conventional English suit of navy blue with grey flannels.

Canada Can Compete

able To Hold Own With Russian Growers Or Those Of Any Other Country

Canadian wheat growers will be able to compete with Russian growers or those of any other country, in the opinion of a prominent official of the Canadian Wheat Pool. Europe will continue for generations to be a large importer of wheat and Canada has the greatest net comparative advantage of any country in being the source of supply, according to this official, who has recently made a personal study of conditions in Europe, including Russia. He believes that Europe will continue to require large quantities of foreign wheat and that Canada is in a perfect position to supply it.

Minerals By Airplane

Radioium Ore To Be Transported By "Plane From Great Bear Lake"

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be radium explains its suitability for air transportation.

Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

Sugar Maples In Canada

The natural range of the sugar maple in Canada extends from the Maritime Provinces to the Lake of the Woods in Ontario. In the forest it may reach a height of over 100 feet, but ordinarily does not average more than 75 to 80 feet in height and two to three feet in diameter. It occurs either in pure stands or is found associated with other hardwoods.

History Of Water Power Development In Canada One Of Remarkable Achievement

More Parking Space

Saskatchewan Providing Recreation Grounds For Tourists and Others
Saskatchewan is providing more parking space, not only for flivvers but for tourists and holiday makers. Manitou Provincial Park, situated along the western shore of Little Manitou Lake, near Watrous, Sask., is now open. This is the first Provincial Park to be created in Saskatchewan under the direction of the Provincial Department of Natural Resources. A similar park is planned at Mudge Lake and plans are also made for others to serve different portions of the province.

The Canadian Government park north of Prince Albert, created a few years ago, has been a factor in furnishing spiritual recreation for the population and in attracting tourists. It is expected that the new provincial parks will have a similar effect.

Alaska Out Is Vigorous

Promises To Fill Important Place As Early Variety

Among the early varieties of oats the Alaska, which has been receiving some considerable attention in recent years is giving great evidence of vigor and growth under field conditions during the present season. A field of registered Alaska under observation in Elgin County, Ontario, this spring has showed every evidence of rapidity of growth, stooling and general vigor.

The Alaska oat matures at about the same time as the O.A.C. No. 3, and is somewhat stronger in the straw with a good quality of grain. It is one of the registrable varieties under the Canadian Seed Growers' Association and promises to fill an important place as a vigorous strong strawed early oat.

Have Real Grievance

Farm Women Object To Being Told They Have No Occupation

Census declarations which refer to housewives as persons of "no occupation" came in for condemnation at a conference at Saskatoon. It was declared that the wording of the census declaration was a keen injustice to wives. They work on the farms from daylight to dark and now they are described as persons of "no occupation." It was felt women, in many cases, were responsible for keeping farms in operation during the present depression. By the marketing of cream, butter, poultry, and eggs, branches of farming looked after by women, they had added materially in holding their lands and homes.

Worked Up Good Business

Out of a job, a young New Yorker got an idea there was money to be made rehabilitating neckties, as Joseph Van Raelle tells the story. He started out by cleaning and pressing ties at for \$1. Trade has been so brisk that he has invested in a delivery car, on the side of which are painted the words "Necktie Balance." A big city offers no end of ways of making a living for the man or woman with ingenuity.

Every calling has its compensations. Others are the only ones who can put women in their places.

Each country develops its power-producing facilities along the most economically desirable lines and space facilities for power production constitute a definite national advantage. Canada possesses this advantage in a marked degree by reason of the extent and location of her water power resources which are such that, except for a relatively small proportion, her entire territory is amply supplied with hydro-electric service. Not only is this true at the present time but there are sufficient undeveloped sites to assure the advantages of this service in the face of expanding demands and advancing settlement.

While complete utilization of the Dominion is not yet attainable, the Dominion Water Power and Hydro-electric Bureau, of the Department of the Interior has collected and analyzed all the stream flow and power data available and obtained the purpose of preparing a reliable estimate of the total resources. This estimate places the total power available annually available twenty-four hours per day, and every day in the year, at over twenty million horse-power with an average of six months in available continuously for six months in the year. These figures are based upon an eighty per cent efficiency of generation. As a matter of fact, efficiency is seldom required continuously full load, and many sites are developed to produce considerably more than their capacity, rated at the continuous or even six months basis, they are able to store the flow at times of high load and draw upon it when the power demand is at its peak. An analysis of existing power installation indicates that the presently known resources would permit of a total turbine installation of approximately forty-four million horse-power.

The history of water power development in Canada is one of remarkable achievement; when the century opened the installation was only 174,000 horse-power, by the end of 1910 it had almost reached one million horse-power, ten years later it was over two and a half million, and at the end of the third decade it was well over six million horse-power.

The provision of this power for the use of the country has, of course, been of incalculable value; in addition, however, the hydro-electric industry has afforded much profitable employment to capital and to labor. It is estimated that a sum approaching \$1,200,000,000 has been invested in the industry. Of this amount, the industry employed \$80,000,000 in 1930 and a further \$300,000,000 will probably be expended in the next few years.

Steeplechase Head Height

Students Chafe Loss Of Half Inch After Test

A loss of half a inch in height is claimed to have followed a 100-hours-of-sleeplessness experiment carried out by two University of Georgia students. Their mental acuteness was decreased by half, concentration was practically impossible; steadiness of nerves and co-ordination of mind and body were impaired. Eyes strained, but sight was not affected. They found it most difficult to remain awake between 11 p.m. and 3 a.m. After two weeks of rest, following the experiment, their height was regained.

Lindbergh May Fly North

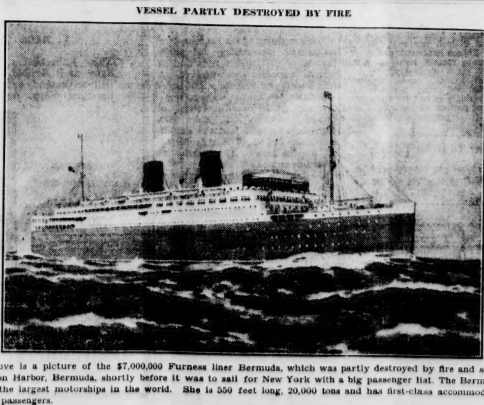

Cut. Charles A. Lindbergh has tentatively decided on the route for his forthcoming flight to the Orient, but this is to be a vacation trip and no definite schedule will be followed. He said that he and his wife were at present working on a route leading northward to Hudson Bay.

Cyprus has started two large reforestation projects.

"The doctor told me to leave town as soon as I could."

"Which doctor?"

"A doctor of law."—Uk. Heria.

ABOVE IS A PICTURE OF THE \$7,000,000 Purcell liner Bermuda, which was partly destroyed by fire and sank in Hamilton Harbor, Bermuda, shortly before it was to sail for New York with a big passenger list. The Bermuda is one of the largest motorships in the world. She is 250 feet long, 20,000 tons and has first-class accommodations for 615 passengers.

CHAPTER XXI.—Continued.

Almost reluctantly Nick turned to go below, moving with stealth, not wishing to disturb the sleeping occupants of "the Sea Bird." But before he had taken a dozen steps he stopped in surprise. Angela was coming toward him wrapped in a long white cloth, her feet incased in satin slippers that made no sound as she came swiftly forward, and laying a hand upon his arm, said softly: "I couldn't sleep. Take me where you can hear us, Nick. I want to talk."

For a moment Nick wished intensely that he had turned in earlier. He didn't want confidences from anyone and Angela's lowered voice and stealthy manner subtly repelled him. He answered, and bated himself for speaking softly: "I was just thinking of going down. This is no time for talk, Angela. It's after midnight, and everyone's asleep."

"Nick, I—I need you." Her voice was pleading; her eyes were moist; so her hand on his arm pressed gently. Nick's pity stirred even while his heart hardened.

"Won't it keep till tomorrow—what you want to say?"

She dropped her hand from his arm and turned away, a sob shaking her shoulders. That was too much for Nick. Recurring his caution of a moment since, he said, stretching out a hand: "What's the trouble, Angela? Of course I'll let you talk if it will turn out as you wish."

They turned, and going to the stern, sat down together.

"What's troubling you?" Nick asked again.

She raised her head. The moon, creeping from behind the clouds, illumined her sharply, and he saw traces of tears upon her face. What a brute he was to be without his sympathy!

"If—I can help you, Angela," he began, when she interrupted:

"You can. I—of course you saw, Nick, that the Colonel's story did me good. But—but not for the reason that you thought. I—I never heard of Painter's Neck before, nor of those awful people—but—but it brought back something else. I shut it out, but it's given me a nightmare. We're nearing port, but I don't know what I want you to tell me."

"Tell you what?"

"Why, you've seen how things are, of course. You know Jim Halliday and I can't get along. They want you to tell me—is that it? I promised—but but what do you believe about the permanency of our marriage?"

The clouds had lifted higher, leaving a path of silver across the sea that led Nick straight to a mountain cabin in old New England. He saw a girl's sweet face upturned to his. He saw himself, a boy then, say a little shy of the big moment—a little uncertain about the future, yet saying with all the ardor and abandon of untutored youth: "Go, my good honest witness for me, I'll and I promise you now that I'll love you . . . and be true to you."

He turned to Angela. She was very beautiful in the moonlight, but he scarcely saw her.

"As for our marriage vows," he answered gently, "I can only say that to me, they were a promise—and that I keep my word."

Her hand drummed nervously on her knee.

"But," she hesitated, "if you know

—absolutely—if you had proof that your wife had been untrue to you—"

Nick night, of course, have felt furiously insulted at this insinuation. What he actually did feel was mirth. The idea was so utterly absurd that he laughed aloud, forgetting for one moment the sleeping shipmates. Then, realizing that Angela might have been hiding her own tragedy behind the question, he sobered instantly.

"Forgive me, Angela, but what you said sounded so outrageous. You see, you don't know Jay. Still, if you want to know, I'll say to a preposterous question, I'll say that I find my wife has—will—ceased to care for me. I'll leave her free."

She drew a quick breath; stretched out a hand; withdrew it hastily, and arose. Nick, too, arose, relieved that the midnight interview was over. He didn't like this sort of thing, and felt impatient when Angela lingered at the rail, her cloak slipping from her shoulders as if by accident.

Nick moved a step away. Why had she put that question to him, anyway? Was he an oracle to settle her domestic troubles? He stirred uneasily, but chose not to take the hint, and stood gazing down into the water that lapped at the ship's side.

He had not troubled to replace the cloak, which seemed, in that dim light, no whiter than the shoulders that rose above it.

"I wish," she said, and her voice trembled, "I wish I had the courage to slip down into those depths and end it all."

Instantly he was at her side—al sympathy.

"What don't you say a thing like that. What has come over you? You were gay as a lark this afternoon, or—troubled? He stirred uneasily, but chose not to take the hint, and stood gazing down into the water that lapped at the ship's side.

"I wish," she said, and her voice trembled, "I wish I had the courage to slip down into those depths and end it all."

Instantly he was at her side—al sympathy.

gels might be search and stay below, but, come to think of it, she was a good sailor. . . . Why in thunder did she have to spoil everything?

Perhaps Jay was right. . . .

This was Nick's last conscious thought as he slept heavily. It was Colonel who woke him with an agitated Colic in striped pajamas, pounding at Nick with one hand even while he struggled frantically with a pair of flannel trousers and a life preserver.

The boat was careening at such an angle that for a dazed moment Nick thought he was standing on his head. Then came a crash, and, instantly broad awake, he knew that a hurricane came upon them.

(To Be Continued.)

Wonders of Electricity

Marvelous Things Seen By Delegates To Banff Convention

Myriads of electrons played and worked at the Canadian Electrical Association Convention at Banff, Alberta, when T. W. Clubb, director of the Westinghouse research laboratory and Dr. Philip Thomas of East Pittsburgh, Pa., combined to control the smallest known things in the world and make them do their bidding.

Lamps were lighted without wires connected to them, and a vacuum cleaner got busy when told to do so and controlled by a ray of light, cleaned part of the stage floor.

Letters on fast revolving discs were instantly and accurately copied by the stroboscope, the ultra-stroboscope; two pieces of a new alloy became magnetized when held pointing downward and due north, and became demagnetized when the direction was changed.

"Hats off," the speaker's lines and stood up or sat down when commanded to do so, and most astonishing of all, a new convention-room lights went on or came out when Mr. Clubb blew on a proto cell or held a lightning match near it.

Delegates who were given explanations about electrons, their speed of travel around the positive nucleus of the atom and the manner in which scientists are using them.

Was Hard Pressed

Sad Patient Of A Debtor Who Did Not Know Which Way To Turn

A man in Oklahoma is reported to have written to his banker as follows, when pressed for payment of a note:

"It is impossible for me to send you a cheque in response of your request. My present financial condition is due to the effect of federal laws, county laws, corporation laws, by-laws, brother-in-laws, mother-in-laws, and outlaws that have been foisted upon an unsuspecting public."

"I have been held down, held up, waited on, sat on, flattened and squeezed until I do not know where I am, what I am, or why I am."

"These laws compel me to pay a merchant's tax, capital stock tax, income tax, real estate tax, property tax, auto tax, gas tax, water tax, light tax, cigar tax, street tax, school tax, syntax and carpal tax."

"The government has so governed my business that I do not know who owns it. I am suspected, expected, inspected, disrespected, examined, re-examined until I know I am that I am supplicated for money for every known need, desire or hope of the human race, and because I refuse to fall and go out and beg, borrow and steal money to give away, I am cursed and discussed, boycotted, talked to, talked about, lied to, lied about, held up, held down and robbed until I am nearly ruined; so that the only reason I am clinging to life is to see what the h— is coming next."

Battle Awards For Militia

The fifth list of battle honors awarded to units of the Canadian Expeditionary Force and to the regiments of both the permanent and non-permanent active militia contingents of five units of the Canadian Expeditionary Force.

These awards were made by the Minister of Militia and Defence, Ottawa, on the recommendation of the War Office, London.

European Travel Much Cheaper

Hotel and Railway Rates Are Lowered On the Continent

European travel is going to be much cheaper this summer according to an announcement from the local offices of the Cunard Steamship Co.

Hotel rates will be lower also. With the money proceeding at a reduced pace and money growing in value daily, the men at the heads of European airroads and hotels realize that the only way of winning the Canadian dollar is by holding out more than a dollar's worth in order to attract it.

Consequently, there have been reduced rates for tours in Great Britain and deep cuts in railway and hotel rates throughout the continent.

It will be much cheaper to travel this season, the reductions ranging from fifteen to forty per cent. In France it will be possible to ride around daily for two weeks for the sum of \$10.45.

The Norwegian Railways have announced a reduction in fares varying from fifteen to thirty per cent. This condition will last all summer.

The French railways are issuing a coupon for \$1.00 which enables the holder to travel on the railroad at a reduced rate for two weeks at \$6.75 for first class and \$3.45 for second class accommodations.

This pass will permit the holder to travel in French railways at any time within the two weeks specified there being no restrictions as to time of use.

For families the rates are greater reductions, the cuts reaching from twenty to forty per cent.

The group business Germany is granting twenty-five per cent. reduction for fifteen to thirty passengers and additional reduction for larger groups.

Many of the hotels will maintain their low winter schedules during the summer.

It is giving us. We are not having any trouble with the grain business, Mr. Enderby said.

Mr. Enderby's plan to give a five-cent bonus on every bushel of grain exported from the United States, the speaker believed was an excellent scheme although he did not think the world which it would be applied was quite clear.

When ships stopped moving it meant a loss of money was lost. Along the route ship crews and elevators were left unemployed. In the Canadian Great Lakes fleet there were 7,600 men and ships with nothing to do. Their families were suffering.

How To Lose Fat and Get That Youthful Feeling

Over in Great Britain when a man is asked to give a dieting and looking the "picture of health" they say:

"I've got that KRUSCHEN FEELING."

That means he takes his little dose of Kruschen Salts every morning. In Germany—Holland—in Australia—in New Zealand—the Kruschen Salts are sold the world over.

Kruschen Salts is not one salt only—it is the combination of six salts necessary to healthy life.

It takes a teaspoonful of the salt water before breakfast every morning, modify your diet and exercise regularly.

But don't miss a morning, for Kruschen not only puts and keeps the stomach, liver, kidneys and bowels in a splendid healthy condition, but purifies your blood-stream, and sends new life and activity to every part of your body.

Little Helps For This Week

"I will guide thee with Mine eye."

—Psalm xxxix.

Of his high attributes beyond the most. I bless my God, I am not wrecked and tossed.

My God for that Omnipotent eye. Beyond whose bliss no secret thing can lie.

In His infinitude of being, lo! I bless my God, I am not wrecked and tossed.

Of small doubt, with power to save. One single sin out of His reckoning comes.

For turning—self-consciousness of its frailty. When morning the terror—"If He knew the whole."

NEEDS OF WEST WILL COME FIRST SAYS ROBERTSON

Winnipeg, Man.—Canada's first obligation is to feed its people, and it will be carried out, declared Senator Gordon Robertson, Dominion Minister of Labor, at the conclusion of an unemployment conference here. The minister conferred with a Manitoba provincial committee, including representatives of cities, towns, and municipalities.

"Nobody knowingly will be allowed to starve in Canada," he declared. He added that he had no doubt that a good many unemployment relief undertakings will be got under way by the Federal Government shortly. "You will appreciate, however, that no member of the government can commit its colleagues to any statement as to what will be undertaken," he informed the meeting.

The west will be looked after first and after that attention will be turned to the needs of the east, the minister said. His tour of Saskatchewan was the first of his tour of the provinces. He was accompanied by Senator Robertson, who has been visiting the province since his recent experience of Saskatchewan, he could hardly have believed the conditions he had witnessed. There was an area populated by some 150,000 people visited by crop failure for several years in succession.

In regard to demands from municipalities for full Federal Government assistance, Senator Robertson said that many municipalities were playing the game. "However, much they denied it, the municipalities themselves had contributed to the ill effect of present conditions by placing their banking on the future to enable them to carry on." He declared the government would do its utmost to alleviate conditions, "but those municipalities that are able to contribute to meet the situation and refuse to do so, will find themselves disappointed."

The Manitoba representatives asked for the Dominion to bear an increased share of unemployment relief. The minister of labor declared his government was willing to extend substantial help to tackle the problem in co-operation with provincial and civil authorities." He was remembering the limitations of the province and municipalities and he asked the conferees to remember that the Dominion Government also had its limitations.

In summing up the situation to the minister of labor, Premier John Bracken stressed the need for relief for the products of prairie farms to relieve the serious situation. He pointed to the great surplus of grain and the heavy production of grain. Unless production is lessened or the farmers secure a better price, living conditions on the farms would be reduced to that of peasants, he declared.

New Potato Policy

Grading Regulations Are To Apply To New Crop

Ottawa, Ont.—Third reading was given by the House of Commons to a bill designed to bring new potatoes within the scope of the grading regulations.

E. J. Young (Lib., Weyburn) charged that the government was endeavoring to secure exclusion from Canada of United States new potatoes, attempted by order of council several weeks ago. Hon. W. R. Motherwell, ex-minister of agriculture, declared the measure was merely an extension of operations of existing grading regulations.

Gandhi Has Faith in Prohibition
Bombay, India.—Mahatma Gandhi has declared his faith in undiluted prohibition. "If I were appointed dictator for one hour for all India," wrote in his weekly, "Young India," "The first thing I would do would be to close without compensation all liquor shops, destroy all opium plants from which liquor is locally extracted, compel factory owners to produce humane conditions for workers, open refreshment and recreation rooms where workmen could get innocent drinks and equally innocent amusement."

Veterans' Bill Shelved
Ottawa, Ont.—The bill to restrict the preference of returned soldiers in the civil service to ex-service men of the Canadian and Imperial forces now domiciled in Canada, was "laid out" in the House of Commons. It was the only bill discussed during the short allotted to private members' legislation.

Italian ships along the Adriatic are operating at capacity.

W. N. U. 1896

Immigration Restrictions

Policy in Future To Be Dissociated From Politics

Ottawa, Ont.—"So far as this government is concerned in connection with immigration, I hope—and I believe that hope will be realized—that if politics in the past has entered into the question," said Hon. W. A. Gordon, Minister of Immigration, in the House of Commons. The mistakes of the past had been made manifest to him in the department, he continued, "and in the future, immigration will be entirely dissociated from politics and will be conducted only in the interests of the country."

"So long as I am in power," the minister continued, "the immigration policy of this country will not be dictated by transportation companies and banking agencies whose interests are governed solely by their pockets."

FRANCE WOULD COMPROMISE ON DEBT PROPOSAL

Paris, France.—France replied to President Hoover's war debt proposal by virtually addressing an appeal to the United States for a compromise in the interests of perfect accord.

The suggested compromise, the Associated Press was informed, dealt with the issue of unconditional reparations payments from Germany, of which France receives about \$100,000,000 annually.

Instead of postponing these payments in line with the Hoover suggestion that all inter-governmental debts be held in abeyance for a year, France wants them to be made as usual to the Bank for International Settlements. Then, under the French counter plan, they would be made available to Germany and to other needy nations in the form of loans.

This arrangement would keep intact the Young plan, which is looked upon by the French as a citadel of settlement. The reply to President Hoover's suggestion was handed to United States ambassador Walter E. Edge by the French consul and at the same time a copy was sent to the French ambassador in Washington for presentation to the United States Government.

In government circles it was said the French counter plan would continue formal payments of the unconditional portion of reparations, in point of fact the money would be paid out, as the money would be returned to her.

Canada Now Controls Mint

Will In Future Be Under Supervision Of Finance Department

Ottawa, Ont.—Control of the Canadian mint where silver and gold currency is coined passed from London, England, to Ottawa when the House of Commons adopted a government bill for the purpose.

It will be under the supervision of the Department of Finance, explained Premier R. B. Bennett. The mint had been under the control of the War Department because sovereigns were coined here, but this practice had ceased some time ago.

Completing Memorial
Quebec, Que.—The work of completing the memorial at Vimy Ridge to Canada's war dead is now progressing materially, and the names of 16,000 Canadians who were missing from the memorial have now all been engraved, according to Major-General S. C. Mewburn, of Ottawa, chairman of the Canadian Battlefields Memorial Commission. The figure of Canada has been completed.

VISITS MACDONALD

Andrew W. Mellon, Secretary of the United States Treasury, who called on Prime Minister Ramsay MacDonald in London, England, R. Hon. Arthur Henderson, British Foreign Secretary, was present during the whole of the conversation between the British and United States statesmen, which Mr. Mellon described as a "purely social call."

Peace River Railway

Construction Of Road From Peace River To Coast Is Assured

Edmonton, Alberta.—Definite assurance that construction of a railway outlet from the Peace River district to the Pacific Coast has been decided upon, has been given by Hon. H. H. Stevens, Minister of Trade and Commerce, said C. H. Crane-Williams, director of the Austin Motor Company, and prominent British business man, who called upon Mr. Stevens in Ottawa recently and who is now in Edmonton.

Mr. Crane-Williams says he also was assured that the route for the Peace River outlet has been selected and that it is necessary for the appropriate only to be passed for the work to be undertaken.

New Warships Leave England

Canadian Destroyers Now On Way To Home Stations

Ottawa, Ont.—Canada's two new destroyers, H.M.C.S. Skeena and H.M.C.S. Saguenay, which have been under construction for the past two years in the yards of Thornycroft & Co. at Southampton, England, have left for their home stations at Esquimalt, B.C., and Halifax, N.S., respectively. The warships are scheduled to reach Halifax on July 3.

Commander Victor G. Broder commands "Skeena."

Traveling in company to Halifax, the warships will separate there. "Skeena" journeying to its Pacific Coast station by way of the Panama Canal, and reaching Esquimalt about the last week in July.

Less Wheat In Storage

Port William, Ont.—Stocks of Canadian wheat in store in all positions are 18,100,157 bushels less than this time a year, according to the weekly report issued by B. A. Ursell, statistician to the Board of Grain Commissioners. The drop was aided by a decline of about 2½ million bushels in the storage amount during the past week, the figure now standing (June 24) at 115,917,238 bushels.

No Archives Branch For West
Ottawa, Ont.—The government has no intention of establishing a branch of the archives department in Western Canada at present. When the civil government vote for this department was before the House of Commons supply committee recently, Hon. C. H. Cannon, secretary of state, said representations had been made but no action was contemplated at present.

Government Annuities

Maximum Annuity Reduced From \$5,000 To \$1,200

Ottawa, Ont.—Second reading was given in the House of Commons to a bill reducing the maximum annuity obtainable under the Government Annuities Act from \$5,000 to \$1,200. The measure was then referred to the committee on banking and commerce for further consideration.

On the motion of Premier R. B. Bennett to refer the bill to the banking and commerce committee, Hon. Mackenzie King, opposition leader, moved an amendment to have the measure referred to the committee on international and industrial relations. Mr. Speaker Black ruled the amendment out of order. Liberals then challenged the motion of the prime minister to send the measure to the banking and commerce committee.

A division followed and the motion of Premier Bennett carried by a majority of 49 votes. The division stood: For, 103; against, 54. U.F.A. Progressive and Labor members supported the government, who voted solidly for the motion. The two Independents (Mr. Neil and Mr. Bourassa) voted with the opposition.

The original government annuities bill was designed for the poor man and a limitation on annuities obtainable had been placed at \$600. Premier Bennett informed the House. Increases in this maximum had taken place until the limit was at present \$5,000. It was never intended that the state should provide annuities, which were free from income tax, paying the expenses from private companies.

It had been found also that certain "traders" invested in large annuities, which were free from income tax, and their creditors could "distress." Annuities were not social insurance, the time for the consideration of which would come later.

Mr. King thought the annuity scheme might be brought into the scheme of social insurance.

E. J. Garland (U.F.A., Bow River) believed the bill was "in the interests of the insurance companies" and was reactionary in nature. He was willing to let it go to the committee for consideration.

The annuities fund, remarked Henri Bourassa (Ind., Labelle), would be the only nucleus for a social and unemployment insurance scheme and "whether we like it or not, we are being forced into social insurance." He suggested the income tax exemption on government annuities be limited to \$1,200.

Air Mail Service

Vancouver To Victoria

Post Office Department Rents Space To Coastal Airways

Ottawa, Ont.—A mail-carrying agreement by air linking Vancouver, B.C., and Victoria, B.C., has been entered into between the post office department and the British Columbia Coastal Airways Co. The service to be inaugurated on July 1, according to post office officials here. No contract has been made, the department merely renting space on a poundage basis when conditions warrant.

But the government recently purchased the Alaska and Washington Air Lines, and is carrying out a triangular schedule of flights—Vancouver-Victoria-Seattle, Washington.

Northwest Rebellion Prisoners

Ottawa, Ont.—Sixty persons are still drawing pensions as a result of the northwest rebellion of 1885. They were brought out during consideration of estimates of the Department of Pensions and National Health, in the House of Commons. The pension item, \$30,000, was approved, also an item of \$45,000 for civil service pensions who suffer as a result of airplane flights while on duty.

Asking Authority To

Provide For Obligations

Government Must Meet Loans Coming To Maturity Soon

Ottawa, Ont.—The House of Commons has given third reading to a bill which authorizes the government to borrow to the extent of \$750,000,000. When the measure was under discussion, R. H. B. Bennett informed the House that maturities for the first few years would amount to over \$750,000,000.

The former authorization, which had been given by parliament during the session of 1928, and which amounted to \$500,000,000, was now exhausted, and it was considered desirable that the government should be placed in a position to take advantage of any opportunities for obtaining money advantageously, which might occur.

Mr. Bennett stated that the obligations of the Dominion, not provided for in the last convention loan, up to and including the year 1937, would total approximately \$517,000,000.

CIVIL SERVICE COMMISSION IS UNDER FIRE

Ottawa, Ont.—Recent charges of fraud connected with civil service examinations and criminal prosecutions based thereon, may result in a government investigation of the Civil Service Commission.

This was intimated in the House of Commons by Hon. C. H. Cannon, secretary of state, when the civil government vote for the commission, consisting of \$235,360 for salaries and \$80,000 for contingencies, was before the supply committee of the House of Commons.

The Civil Service Commission estimates formed the basis of a lively debate which occupied some hours of the time of the committee. Major C. G. Power, Liberal member for Quebec, presided, and the discussion, when he moved to reduce the appropriation to \$100, later, when Mr. Cannon had represented that the commission was a statutory body and that Mr. Power's amendment involved breaking what amounted to a contract with that body it or not, we are being forced into social insurance." He suggested the income tax exemption on government annuities be limited to \$1,200.

He substituted another calling for a reduction in the amount by \$100. The second amendment was defeated by a vote of 69 to 17; and the item passed.

Merit formed the whole basis for the operations of the Civil Service commission, Mr. Cannon said. It had been represented to the government that inquiries should be made regarding operations of prosecutions, past and present, in connection with alleged frauds which would destroy this system. The government, however, had taken no action in view of the fact that prosecutions were pending in the courts of Ontario and Quebec and that the whole matter was sub judice.

But the government intended, when the criminal prosecutions were over, to examine the evidence with the greatest care, and if it warranted, there must be further action. He said how far the Civil Service Commission was vitiated by practices brought out at the trials. If such an inquiry was held, said Mr. Cannon, its results would be presented to parliament.

In moving for reduction of the estimate of the Civil Service Commission, Major Power declared that he objected to the principle of a non-responsible body administering the affairs of the country. He believed that it was a negation of the principle of responsible government to have a body which was not responsible to the people, he said, in moving the amendment, excepting that he did not think the Civil Service Commission was a good thing. He was willing to let the defeated candidate in his riding make the appointments for that constituency.

He was strongly supported in his position by Armand Lavergne, Deputy Speaker of the House of Commons, who stated that Canada's judicial system was regarded as being of a high quality. Judicial appointments were made by the government in power, but that did not result in the selection of inferior men as judges. A minister in charge of a government department should not be required to accept the dictation of the Civil Service Commission.

The Civil Service Commission system had its supporters. Woodworth, Labor member for Winnipeg North Centre, expressed the opinion that it would be fatal to revert to a system where each member felt called upon to reward individuals for their loyalty for services rendered. The result would be to degrade the position of a member of parliament.

DIFFICULTIES IN THE WAY OF A WHEAT BOARD

Ottawa, Ont.—Legal difficulties surround the establishment of a wheat board. R. H. B. Bennett told the House of Commons. Representatives of the three prairie provinces were in consultation with the federal government, and suggestions were made, said the prime minister, which might surmount the difficulties. No decision, however, was made at the conference in Ottawa. The western representatives were considering the plans submitted.

John Vallance, Liberal member for North Battleford, introduced the subject. He asked if the government in view of the representations, intended to create a wheat marketing board.

He indicated that the private council affected the question, said Premier Bennett. It had been established it was not competent for the Dominion to infringe upon the sovereign rights of the provinces and it could not fix prices. This had been the judicially established fact, said the newspaper. There were limitations to the jurisdiction of the Dominion and it is far more difficult to create such an organization (a wheat board) than it is to speak about one."

To E. J. Garland (U.F.A., Bow River) Mr. Bennett said a province would not evade an enactment of the Dominion. Federal jurisdiction either existed or it did not and no organization could pass enabling legislation.

In closing the incident, Premier Bennett said there was a large body of public opinion against a wheat board. Because of this, care must be exercised. It might be counterproductive to have a wheat board go to the courts and secure an injunction restraining the board from functioning. It might eventually have it declared unconstitutional.

Passing Of "Trader" Horn

Notable Figure Dies In London, England

London, England.—Sir Alfred Knollys, "Trader" Horn, co-author of the book "Trader Horn," died recently in a London hospital after a brief illness. He was about 75 years old. "Trader" Horn rose from a pedlar of wares to a famous explorer.

He was a member of the Royal Society of Arts and the Royal Society of Literature. He spent most of his life among the natives of the dark continent, and captured his story in the book "Trader Horn," written in collaboration with Mrs. Ethelred Lewis.

He visited North America in 1928, delivering a series of lectures and attended literary gatherings with his wife in the United States. He was a keen sportsman and a keen hunter. He was a member of the Royal Society of Arts and the Royal Society of Literature.

LINDY ALI SET FOR THE FLIGHT TO THE LAND OF THE RISING SUN

The much-heralded flight of the Lindberghs to Japan and China, via the Pacific Ocean, is expected to commence very shortly. This picture (left) shows Col. Lindbergh and Ann Morrow Lindbergh arriving at the landing field in the plane which they will attempt the hazardous trip. The photo on the right shows the Lockheed-Sirius monoplane being tried out by Colonel Lindbergh over New York.

Donates Cup For Contests

Governor-General Gives Trophy To Model Aircraft League

Ottawa, Ont.—His Excellency the Governor-General has donated to the Model Aircraft League of Canada a handsome silver cup for annual competition at the national model contests. The costly trophy, bearing the arms of the Earl of Beaulieu, will be set up for competition at the second annual model aircraft contest to be held here on August 28 and 29.

The trophy is to be awarded to the greatest champion of the meet and will be emblematic of leadership in model flying in Canada.

Seeking Markets For Butter
Ottawa, Ont.—An effort will be made to improve the position Canadian butter companies occupy on the market of the United Kingdom, Dr. J. A. Ruddick, dairy commissioner has left for England and will address himself to the Ministry for Agriculture and similar exchanges at Bristol, Manchester, Glasgow and other centres.

CHAMPION CHATTER

Vol. 4 Thursday, July 5, 1921 No. 28

Published in the interest of the People of the Province of Alberta, and the People of the City of Calgary.
GEO. L. DEPUÉ, Editor.

I don't know why a chrysanthemum will so soon, unless it's because after it has been born a few days it learns its name.

Once more the Elks have put over one of the best parties of the season which Champion has ever witnessed.

Officers: How did that accident happen? Driver: My wife was asleep in the back seat.

Our heartfelt sympathy goes out to the family of the late Walter Willes in their sad bereavement.

A bulletin board outside a church announced Sunday's sermon: "Do you know what hell is?"

Underneath was printed in smaller letters: "Come in and hear our

"Good Equipment Makes a Good Farmer Better."

new organ." The occasion of the celebration brought to the gathering many old acquaintances.

There is a place for everything, and with the neighbor's loud speaker we go there.

Mr. and Mrs. Gussick along with Mr. and Mrs. Ryan all of whom attended the celebration.

The Vulcan Band are to be congratulated on the music they supplied as well as the fact they were not stung with it.

We will give a prize to the one proving when they saw a more interesting series of ball games that was put up by the team involved on the first home.

Wouldn't you like for us to explain the McDugall savings investment plan to you?

Tennis meeting Friday evening in church at 9 p.m.

Mrs. Sargent left recently for Cochrane, where she will reside in future.

Mrs. (Dr.) Freese from the cushion presented to the Royal Purple by Mrs. W. S. Ryan.

Mr. and Mrs. L. P. Schwartz of Calgary are visiting with Mr. and Mrs. G. A. Fath and other relatives.

Champion C.W.L. were entertained by Vulcan C.W.L. on Thursday, a large number taking in the trip.

Mr. and Mrs. Wolken of Kansas are visiting with Mrs. A. E. Bach, Mrs. Wolken being Mr. Bach's sister.

Mrs. W. A. McIntyre's mother, Mrs. Bowlen of Warner, who has been a visitor here, returned to her home on Monday.

Mrs. J. S. Collins had the misfortune to run a tack in her foot, resulting in a painful injury from ensuing infection.

Out of town students home for the holidays include Miss Roberta Campbell, Miss Helen Farmer and Don Stephenson.

Welcome visitors on July 1st were Mr. and Mrs. W. S. Ryan and Mr. and Mrs. Gussick of Warner; Mr. and Mrs. Sam Jopling and B. M. Roberts of Calgary, all former residents here.

Mr. and Mrs. A. S. McDougall, C. D. McDougall, Mr. and Mrs. Clarence Davis and Mr. and Mrs. Brown McDonald attended the picnic of Shorthorn breeders at the Prince of Wales' ranch on Saturday, June 27th. All were pleased with their experience.

Mr. and Mrs. W. C. Fry and family were here during the week, en route to Spokane, where they propose residing in future. While they like Alberta, Mr. Fry's health is so much better at the coast that this outweighs all other considerations. While here they were greeted by the numerous Champion friends.

John, the four year old son of Mr. and Mrs. Andy Low of Vulcan, will be taken to the best Cochrane hospital in Calgary as soon as room is available for him. The little chap is suffering from paralysis and it is necessary for his legs to be kept lightly strapped.—Carmangay Sun.

Mrs. Low was formerly Miss Pearl Woodman, Champion.

Guy Cooper, in "A Man from Wyoming" is the special talking picture for this Saturday Night. Make an effort to attend as your attendance may mean, many hours of real pleasure, in the weeks to come.
